

Su'aasha Ugu Horeysa ee Foomka Isdiiwaan gelinta ee Dheeraadka Ah

To help you determine if the enrolling student has a disability, simply add the following question to your current intake/registration form. If the student marks "haa", use the attached "Supplemental Disability Registration Form" to gain more information about their disability and needs in the classroom. This form can help you learn more about the student, if they need accommodations, and if they are an appropriate fit for Adult Basic Education.

If the student has a case worker, social worker, guardian or family member that you may want to contact, ask them to sign the "Consent for Release of Information" form. This will allow you to contact, share, and gain information from the students support system and provide you with information to best serve the individual.
